

Small Business Planning = BIG BUSINESS RESULTS

Through my Entrepreneurial Leadership Coaching, I work with people who are serious about starting a small business and small business owners who are serious about growing their business.

Comes a time in everyone's life when they imagine what it would be like to define their own career and financial destiny. That time may come voluntarily or out of necessity. For the many who ultimately decide to move their dream into action, most fall short of their desired results due to the lack of focus, preparation, applied skills and a written plan that actually drives the business.

If for any reason you are serious about launching or growing a small business, here is the deal. Putting your ideas down on paper in a clear, concise and actionable format will be the hardest challenge you will face. Void of a well thought out business and marketing plan with clearly defined goals, the odds of successfully launching and growing your business is slim to none. Now for the flip! This process can be the most energizing, rewarding and fun exercise you'll ever do.

I am writing this with the authenticity of leaving a senior executive position in corporate America to start my own small business venture from scratch several years ago. Through my own journey, I've developed a coaching program specifically to help small business owners to write their plans and live the lifestyle they always imagined.

The Entrepreneurial Leadership Excellence Course™ is now available to qualified candidates in individual and group coaching curriculum formats. Group sessions are limited to provide individualized attention. Graduates will complete this course with:

1. A Results-Driven Business and Marketing Plan.
2. Unlimited Coaching Support and Materials.
3. The Ability To Set and Achieve Any Goal Desired.
4. A Process To Effectively Lead A Balanced Life
